

Sacramento House Rabbit Society

P.O. Box 19832 • Sacramento CA 95819 • 916/863-9690

Adoption Questionnaire

Date:

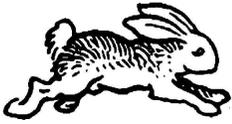

Thank you for considering adoption with Sacramento House Rabbit Society. All rabbits have their own individual personalities, so our goal is to find the best match suited for your environment and lifestyle. Our adoption fee is \$75 (\$140 for a couple) and all of our rabbits are spayed/neutered and vaccinated for Rabbit Hemorrhagic Disease Virus (RHDV).

Please provide answers to the following questions to help us determine if one of our rabbits will be a good match for you and your family.

*Please only complete if you are over the age of 18 and living within the Sacramento area.

Continue on the other side if you need more space.

- 1) What made you interested in adopting a rabbit at this time?
- 2) Please describe your experience with rabbits or expectations of having a rabbit if this will be your first.
- 3) What type of personality or behaviors are you looking for in a rabbit?
- 4) Please describe the type of spaces you plan to keep your rabbit when unsupervised (when you are away at work or asleep) and during social playtime if there will be a separate or expanded area to exercise.
- 5) Do you plan to allow your rabbit outdoors or will your rabbit remain indoors 100% of the day and night?
- 6) How would you describe your lifestyle? (Busy, active, quiet, etc.)
- 7) How much time do you spend at home and how much social and exercise time will your rabbit have every day?
- 8) How many people share your home and who will be the primary caregiver?
- 9) If there are children, what are the ages of each child?
- 10) If there are other pets, please list what other animals live in the same home (If there are dogs, please list the breeds).
- 11) Contact information: Address, phone number, email and the best time to contact you.

Due to the emergence of Rabbit Hemorrhagic Disease Virus (RHDV) beginning in 2020, we strongly recommend no outdoor playtime, even when vaccinated. You can find more information about this virus at: <https://rabbit.org/rhdv/>

You will need to get your home ready before bringing a bunny home. Read more about living with rabbits at allearsac.org or rabbit.org, or buy the House Rabbit Handbook. Bunny-proof your home and protect electrical cords. Decide what to buy in terms of enclosure, exercise pen, or other housing, plus food, litter boxes, toys and other care items. Locate an exotic veterinarian who sees rabbits in your area.

*If you are still researching rabbits as companion animals and need more information, please check out the HRS video about living with house rabbits on YouTube with comedian, actress, and House Rabbit Society supporter, Amy Sedaris: <https://www.youtube.com/watch?v=Ev-5T3xEe9k>
